NB: An additional minimum service charge of $30 per knife will be applied to each Tungsten Carbide knife with excessively damaged areas able to be removed.

(All prices in Australian Dollars)

* GST is not charged for these services *

All sharpening is performed on equipment which is described as: “The most scientific and by far the best . . . . . . . “

(Lynches Medical Laboratory Technology Vol II p906)

These sharpening units are routinely optically inspected and serviced on custom machinery.

METHOD FOR DISPATCH OF MICROTOME KNIVES FOR SERVICE

N.B. cost of freight/postage is not included in sharpening price.

1. Ensure the knife is firm within its box. If necessary place light packing over knife before closing lid to restrict movement.
2. Wrap box firmly or use a heavy duty rubber band so that knife cannot come free during transit.
3. Protect box from damage by covering with bubble wrap and placing in a padded envelope or postpak.

Within Australia return of Knives is by Express Post unless otherwise requested.

Adele Dumpleton
Microtome Knife Sharpening

Skilled operation of ultra precision specialised equipment ensures the best possible cutting edge is obtained during the sharpening process.

All knives are microscopically inspected at X120 magnification and protected with anticorrosion solution prior to return.
